KC-262 Polyfoam is a high foaming, all purpose cleaner, degreaser, and foaming additive which contains no phosphates or VOCs. It produceds a high stable foam for removing soils, especially in hard to reach areas. Works in all water conditions, no additional additives needed. KC-262 Polyfoam may be applied by brush, through a foaming device or by soaking on equipment, utensils, walls, and floors in all departments of meat, poultry, dairy and general food processing plants.

DIRECTION FOR USE

Cleaning: Rinse area to be cleaned with hot water (100°F-140°F) to remove gross soil. Dissolve 1 to 4 ounces of KC-262 Polyfoam per gallon of hot water (100°F-140°F). Apply with brush, spray, through a foaming device or by soaking, and let stand. Thoroughly rinse with potable water to remove all residue.

Foaming additive: KC-262 Polyfoam can be used as a foaming additive for acid, caustic, or chlorinated caustic cleaners at 1 to 4 ounces per gallon of solution. When using as a foaming additive, only add KC-262 Polyfoam to water diluted acid, caustic, or chlorinated caustic products. Mixing of undiluted KC-262 Polyfoam with other chemical products can create unsafe conditions.

Before use in federally inspected meat and poultry food processing plants and dairies, food products and packaging materials must be removed from room or carefully protected. This product should not come into direct contact with meat, shell eggs, or other food products.
