

TECHNICAL DATA

PAC-505

POWERFOAM

Description:

A heavy duty chlorinated alkaline cleaner and degreaser designed for use in food plants, poultry processing plants, dairies, rendering plants and many other applications. It is best applied with a foam generator or low-pressure foam sprayer. The foam created will cling to vertical surfaces and allow prolonged contact time for the product to soften and emulsify soil deposits.

Directions for Use:

For effective degreasing and cleaning, use 1 part to 40 parts of water.

Sodium Hydroxide	Use Dilution
0.05-0.08	100 mL / 10 L water
0.15-0.18	250 mL / 10 L water
0.30-0.35	500 mL / 10 L water

For lighter degreasing and sanitizing, use a solution of 1 part to 100 parts of water to achieve 200 ppm available chlorine.

Available Chlorine	Use Dilution
200 ppm	100 mL / 10 L water
500 ppm	250 mL / 10 L water
1000 ppm	500 mL / 10 L water

All food contact surfaces should be rinsed thoroughly with potable water.

Contains:

Sodium hydroxide, sodium hypochlorite, surfactant.

FOR FOOD PLANT & INDUSTRIAL USE ONLY
