

## TECHNICAL DATA

# PAC TRIPEMAX E

### LIQUID BLEACHING COMPOSITION

#### Description:

PAC Tripemax E is an effective food-grade bleaching compound for use in beef feet and tripe processing. PAC Tripemax E can also be used to destain conveyor belts and other surfaces and as an additive in hard surface cleaning applications.

#### Directions for Use:

**Tripe:** Use approximately 90-150 mL of PAC Tripemax E per unit of product. Thoroughly rinse with potable water to remove all residue. For further information, please contact your PSSI Chemical Innovations Representative.

**Destaining and Cleaning:** Use approximately 30-90 mL of PAC Tripemax E per 1 Liter of water for bleaching of plastic belts, tubs, and utensils.

Food equipment and food contact surfaces should be rinsed clean with potable water after use. Avoid contamination of food during application and storage.

#### Contains:

Hydrogen Peroxide.

**FOR FOOD PLANT & INDUSTRIAL USE ONLY**
